

Support me as I participate in the Team Heifer.

Participant's Name: Rob Bean

Team Name: The Big Moo Canoe

Yes! I will make a contribution to help Heifer International.

Heifer (\$500+) What would be the better gift for someone you love — another present that gathers dust on a shelf? Or a heifer and training purchased in honor of your special someone that brings health and hope to people in need? Better still, your gift multiplies, as the first female calf from your cow is passed on to another family in need — then they also agree to pass on an animal of equal value, and so on. Now that's quite a gift. A good dairy cow can produce four gallons of milk per day — enough for a family to drink and share with neighbors, and still have enough left over to sell.

Water Buffalo (\$250+) Nothing's more satisfying than finding exactly the right solution to a problem. That's the good feeling you get when you give an Asian subsistence farmer a water buffalo.

Goat (\$120+) Goat's milk is the only milk known to half the world's people, but 80 percent of mothers and children in rural areas do not have any type of milk or milk products. The gift of a dairy goat is a lasting, meaningful way to help a struggling family on the other side of the world.

Trees (\$60+) There is an alternative to eroded hillsides, vanishing farmland and forests, polluted water and urban sprawl. Maybe not one big solution, but lots of little ones.

Pig (\$60+) To help hungry, undernourished families put protein back in their diets at little cost, Heifer teaches farmers how to raise healthy pigs in countries where waste products are the only available feed. In Honduras, pigs eat rejected bananas, and in the Dominican Republic, they thrive on damaged yams.

Honeybees (\$30+) From India to the Dominican Republic, bees from Heifer International help struggling families earn income through the sale of honey, beeswax and pollen. Beehives require almost no space, and once established, are inexpensive to maintain. As bees search for nectar, they pollinate plants. Placed strategically, beehives can as much as double some fruit and vegetable yields. In this way, a beehive can be a boon to a whole village.

Chicks (\$20+) Chickens are a real value. Starting at six months, they can lay up to 200 eggs a year — a reliable source of protein for children who otherwise subsist mostly on starches. Extra eggs can be sold to pay for school, clothes and medicine. And in the vegetable garden, chickens peck at bugs and weeds, scratch up the soil and enrich it with droppings.
